

Services NOT Included with a Spear Direct Care Membership

At Spear Direct Care, we address the vast majority of an individual's health care needs. However, there are some services that are not included in the direct primary care program. We encourage our clients to combine their Spear Direct Care membership with either a cost share program or a high-deductible insurance policy to cover in-person specialist visits, surgeries, and hospital services.

The following list is not all inclusive and are examples of services not covered with the monthly membership fee:

- Medications and supplies purchased through the pharmacy or other sources
- Laboratory services provided outside of our clinic including pathology
- Medical Imaging (i.e. x-rays, CT scans, MRIs, ultrasounds, etc.)
- The radiologist fee for interpreting and reporting the imaging
- Services provided by other providers and specialists including to whom the client is referred
- Emergency Department Visits
- Hospitalization including inpatient admission, rounds, and discharge
- Surgery and anesthesia fees
- Ancillary services (i.e. home health or Hospice orders for Medicare patients)

For more information, questions, or concerns, please reach out to the clinic by phone or text at 208-502-2744 or by email at info@speardirectcare.com.

Thank you,

The Spear Direct Care Team
